

Prestige XL2 Pro

DTF Printer

Dual printhead, 9-color system for users who need **high color fidelity** and professional output.

Expand Your Gamut.

Nine colors, not four

CMYK + White + Light Cyan, Light Magenta, Green and Orange, for vibrant and accurate color reproduction.

Dual printhead configuration

An Epson i3200HD paired with an i1600 delivers the extended gamut without giving up output quality.

23.62" (60 cm) print width

Full 24" class output at 45 to 65 sq. ft. per hour.

White ink that stays ready

White Ink Management System prevents clogs and keeps white consistent across long color-heavy runs.

Head strike and tension sensors

Printhead protection and smooth material handling, with active and passive auto-cleaning for reduced downtime.

Support & Warranty

- **Lifetime** DTF Station tech support
- **1-year warranty** on non-consumable parts
- **6-month warranty** on up to two printheads, with onsite training
- **neoStampa RIP** and DTF Station Pilot driver included

See it run. Contact your DTF Station **dealer** or visit dtfstation.com.

Nine Colors At Twenty-Four Inches.

Nine colors, not four.

The XL2 Pro runs CMYK + White + Light Cyan, Light Magenta, Green and Orange. The extra four channels smooth gradients and hold accurate color on the shades a four color process can only approximate, which is what separates a good print from a matched one.

Where the gamut earns its keep.

Photographic artwork, brand colors that have to match, and gradients that would otherwise band are the jobs where the extra channels pay for themselves. For flat spot color work, a four color XL2 is the better buy.

Production automation as standard.

White Ink Management System keeps white circulating, active and passive auto-cleaning cut downtime, and head strike plus media tension sensors protect a long run.
